

Antifoam 2020

Mineral Oil based antifoaming agent for general purposes foam control

Antifoam 2020 is an emulsion foam control agent designed to deliver effective control of foam with 50% active matter. The product will work very well in most paint and coating systems the product works very well as a general-purpose foam control agent in Paper industry, textile auxiliaries, Paints, Construction, Coatings, Adhesives and a variety of other media.

Chemical Properties:

Antifoam 2020 is a Mineral Oil based antifoaming agent with an emulsifying system.

Physical Properties:

Appearance	White Emulsion
Ionic Character	Non-ionic
PH	7~ 8
Viscosity	2000 ~ 5000

Typical Applications:

- Paints
- Paper Industry
- Aqueous Inks and Coatings
- Adhesives & Glues
- Emulsion Polymerization

In paints and coatings, **Antifoam 2020** should be used as received at a starting dosage of 0.15 g/l. In Ink and coatings, **Antifoam 2020** should be used at dosage rates of 0.3 to 0.5% of the formula weight.

Please stir well before use.

Keep @ temperature max. 40°C
