

## ANTIFOAM EP20

**Antifoam EP20** is an emulsion foam control agent designed to deliver effective control of foam. The product will work very well in most paint and coating systems, the product works very well as a general purpose foam control agent in: Paints, Constructions, Coatings, Adhesives, paper industry and a variety of other media.

### Chemical Properties:

**Antifoam EP20** is a silicone based antifoaming agent with an emulsifying system.

### Physical Properties:

|                   |                |
|-------------------|----------------|
| Appearance        | White Emulsion |
| Active Content, % | 20             |
| Ionic Character   | Non ionic      |
| PH                | 8~ 8.5         |
| Viscosity         | 2000 ~ 5000    |

### Typical Applications:

- Paints
- Aqueous Inks and Coatings
- Adhesives & Glues
- Emulsion Polymerization
- Paper processing applications

In paints and coatings, Antifoam EP20 should be used as received at a starting dosage of 0.15 g/l. In Inks, Antifoam EP20 should be used at dosage rates of 0.3 to 0.5% of the formula weight, other applications amount could be controlled according to foam generation.

**Please stir well before use.**

**Keep @ temperature max. 40°C**
