

APOMUL DR-C

Modified polyvinyl acetate emulsion, stabilized with polyvinyl alcohol especially designed to be used as a multipurpose adhesive, including wood working, emulsion putty and board lamination.

APOMUL DR-C is particularly suitable for the manufacture of quick setting wood adhesive for which a high thermal stability in the glued joints is required.

TYPICAL PROPERTIES

Solid content %	49 ± 1
Chemical basis	Polyvinyl acetate
Protective colloid	Polyvinyl alcohol
Appearance	Milky emulsion
pH	4.5 ± 0.5
Viscosity@23 °C (Brookfield Viscometer, spindle # 7 @ 20rpm)	70,000±10000 cps
Plasticizer	Yes
Film clarity	Clear
Water resistance	Good
Mechanical stability	Excellent
High temperature stability	Good
Resistance to air and humidity	Excellent

HANDLING PRECAUTIONS

There is no health risk in handling APOMUL DR-C The usual precautions in handling chemicals should be observed and it is recommended that operatives should wear goggles and gloves when handling the product. Any contact with the skin or eyes should be washed immediately with copious amount of cold water.

Please stir well before use.

Keep @ temperature max. 40°C.
