

## NONIL N

### New developed strong wetting agent low foam .

**COMPOSITION** : Alkyl polyglycol Ether .

### Technical data :

Appearance : Clear liquid  
Ionicity : Non - ionic  
Solubility : Soluble in cold water  
pH : 6-7  
Compatibility : Compatible with anionic and cationic substances as well as acid and basic dyestuff .  
Stability : Resistant to hard water and alkalis .

### APPLICATION :

- 1 - "NONIL- N" can be used as wetting and washing agent for textiles made from cellulose and synthetic fibres .
- 2 - "NONIL- N" has an outstanding and emulsifying properties. Accordingly, can be used in precleaning, scouring and washing and readily remove oily and greasy contaminations .

Material can be treated for 30 mins. @ 60°C.

0.5-2 g/1	" NONIL N"
1.0-2 g/1	Soda Ash .

- 3 - "NONIL - N" displays remarkable dispersing effect in after treatment of dyed and printed material .

With the use of :

0.5-2 g/1 " NONIL N"

Please stir well before use.

**Keep @ temperature max. 40°C.**
