

NONIL SSA NEW

NONIL SSA NEW is a solvent base auxiliary designed for scouring scour /dye and post dying operation / de sizing and oil remove wetting agent

General properties

Chemical composition blend of nonionic surfactant
Ionic character nonionic
pH 1% soln. 7-8
Appearance Colorless-yellowish paste

Benefits

- 1- Wetting, Oil Remove and emulsifies dirt wax etc. from fibers ,yarns and fabrics. Due to its solvent content ,its especially suited for removal of oil and grease stains
- 2-May be used in scour /dye auxiliary on synthetic blends with natural fibers , as **NONIL SSA NEW** possesses excellent dye dispersing power.
- 3-Has low foaming properties and used in the non- fully flooded jet dying machines.
- 4-Can be used in the reduction clear bath to remove unfixed disperse dye from the surface of the polyester fabric .It is stable to caustic soda and sodium hydrosulphite
- 5-Has no effect upon the buildup ,yield or fastness of disperse ,acid or pre-metallised dyestuffs .
- 6- Can be used along with suitable alkali . e.g. caustic soda . soda ash phosphates in pre-scouring or soaping off operations

Application

NONIL SSA NEW varies according to process applies but levels 0.5-2 g/l should be employed .
