

PRODUCT HT/LF NEW

PRODUCT HT/LF NEW is a mixture of anionic wetting, levelling and dispersing compounds low foam developed with special organic sequestering agent. It is used for dyeing for polyester and cotton reactive and disperse dye.

.
.

GENERAL PROPERTIES

Appearance	: brown liquid.
Ionicity	: Anionic.
pH	: 7-9
Dissolving	: With cold or warm water.
Stability	: Resistant to alkalis and electrolytes.
Compatibility	: Good with anionic and nonionic products.

SPECIAL PROPERTIES

PRODUCT- HT/LF NEW has a good wetting and leveling properties, which enhance the penetration of dyestuff liquor in the fiber . It has also the power to dissolve and disperse impurities in the fiber, with high stability of the dye liquor .

***PRODUCT- HT/LF NEW** is low foaming so it has no problem to be used in jet.*

APPLICATION

PRODUCT –HT/LF NEW is suitable for use in both exhaust and pad processes.

Exhaust process: 0.5 – 1.25 g / l

Where add half of the quantity to the water used to dissolve the dyestuff and the other half added directly to the dye bath.

Pad process : 0 .75 -2 g / l

Where the product should be added with the water used to dissolve the dyestuff or directly to the padding liquor.

Please stir well before use.

Keep @ temperature max. 40°C.
