

PRODUCT RWO NEW

Product RWO NEW is a washing off agent for reactive dyes and printed goods improving rocking fastness.

Appearance	Dark brown liquid
PH (1% aq. soln)	8 - 9
Ionic character	Anionic

Chemical Composition

Product RWO NEW is a non-surface active anionic polymer.

General Properties

- 1- Is a highly efficient soaping agent for reactive dyes removing partially adhered color and holding it in suspension.
- 2- Prevents staining of white or pastel ground shades on printed goods.
- 3- Gives excellent wet and rub fastness to treated goods.
- 4- Is non-foaming and can therefore be used in jet dyeing machines and spray washers.
- 5- Possesses hard water dispersing properties, but shows minimal effect on metal containing dyes.
- 6- Is liquid and easily handled and dispersed.

Application

It is recommended that after dyeing or printing the goods are firstly given a cold and then hot rinse, followed by soaping in 1-3 cc/l **Product RWO NEW** at 80-90⁰C. The goods should then be rinsed hot and cold and finally fixed, e.g. with **SUPER FIX** , if necessary.

Please stir well before use.

Keep @ temperature max. 40°C.
